Chapter 1: Laying the Foundation: Domain Name and Web Hosting

Before you start building your website, you need to choose a domain name and secure web hosting. Your domain name is the unique address of your

website on the internet, while web hosting provides the space for your website's files and data. In this chapter, you'll learn how to select a suitable domain name, find reliable web hosting providers, and set up your website's foundation.

Chapter 2: Crafting the Look and Feel: HTML and CSS

HTML, or Hypertext Markup Language, provides the structure of your website, while CSS, or Cascading Style Sheets, controls its visual appearance. In this chapter, you'll delve into the basics of HTML and CSS, learning how to create website layouts, add text and images, and style your website to perfection. You'll also discover best practices for accessibility and cross-browser compatibility.

Chapter 3: Adding Interactivity: JavaScript

JavaScript is the programming language of the web. It brings life and interactivity to your website, allowing you to add features such as dynamic menus, forms, and animations. In this chapter, you'll learn the fundamentals of JavaScript, including variables, data types, and control flow. You'll also create practical JavaScript functions to enhance the user experience on your website.
