Rake is a necessary evil in the world of poker. It's how poker rooms make their money, and it's something that every poker player has to deal with. However, there are a number of mistakes that players can make when trying to avoid rake, and these mistakes can end up costing them money in the long run.

Mistake #1: Not Understanding How Rake Works

The first mistake that players often make is not understanding how rake works. Rake is typically taken as a percentage of the pot, and it's usually capped at a certain amount. For example, a poker room might take a 5% rake on all pots up to \$5.

It's important to understand how rake works so that you can make informed decisions about the games you play and the stakes you play at. If you're not sure how rake works, be sure to ask the poker room staff or consult the poker room's website.

Mistake #2: Playing in Games with High Rake

One of the best ways to avoid rake is to simply play in games with low rake. Not all poker rooms are created equal when it comes to rake, so it's important to do your research and find a poker room that offers low rake games.

There are a few different ways to find poker rooms with low rake. You can use a poker room directory or consult a poker forum. You can also ask other poker players for their recommendations.

Mistake #3: Playing Too Many Hands

Another mistake that players often make is playing too many hands. The more hands you play, the more rake you'll pay. It's important to be selective about the hands you play, and only play hands that you have a good chance of winning.

If you're not sure whether or not you should play a hand, fold it. It's better to fold a hand and save your money than to play a hand and lose money to the rake.

Mistake #4: Not Taking Advantage of Rakeback Deals

Rakeback deals are a great way to reduce the amount of rake you pay. Rakeback deals allow you to earn back a percentage of the rake you pay, and this can add up to a significant amount of money over time.

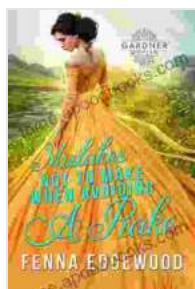

There are a number of different poker rooms that offer rakeback deals, so it's important to do your research and find the best deal for you.

Mistake #5: Not Playing at a Poker Room that Offers Rake-Free Games

Some poker rooms offer rake-free games, which are a great way to avoid rake altogether. Rake-free games are typically only available for a limited time, so it's important to take advantage of them when you can.

If you're looking for a way to avoid rake, playing at a poker room that offers rake-free games is a great option.

Avoiding rake is an important part of being a successful poker player. By understanding how rake works, playing in games with low rake, playing fewer hands, taking advantage of rakeback deals, and playing at poker rooms that offer rake-free games, you can minimize the amount of rake you pay and increase your profits.
